\*fantastic\* frontend performance tricks and why we do them

whee!

Jenna Zeigen #perfmatters 4/2/19

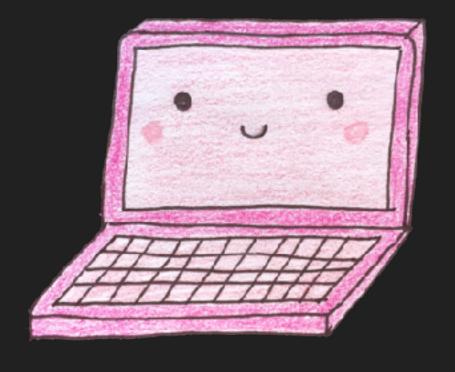

#### Senior Frontend Engineer at Slack

Organizer of EmpireJS
Organizer of BrooklynJS

# jenna.is/at-perfmatters @zeigenvector

very online.

If you think frontend engineering is lesser or easier, I dare you to delve into the world that is frontend performance optimization.

1:22 AM - 16 May 2018

rendering

(keep things small)

rendering

```
(keep things small)
(keep things smart)
```

# rendering

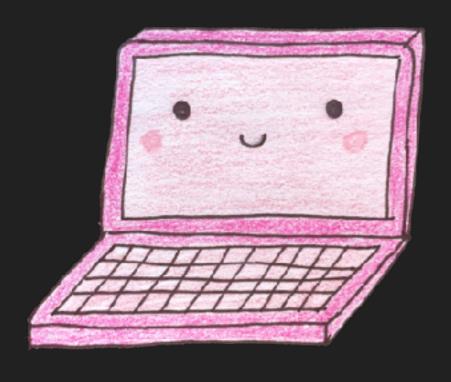

```
+
```

```
(keep things small)
(keep things smart)
```

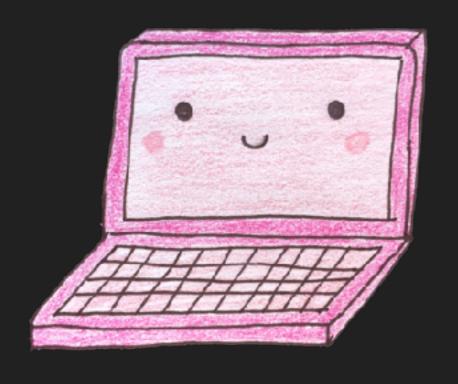

## rendering

(keep things smooth)

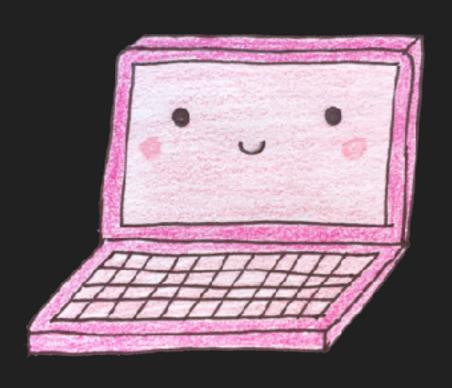

# but wait websites?

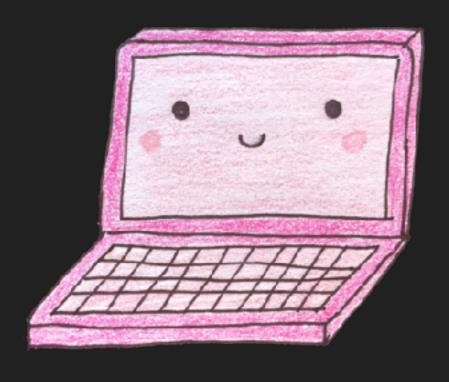

'Cause I'm on the network getting packets
Server's sending me three-hundred and five

The bigger you send,
The harder you fall
Take it from me, girl,
You gotta start small

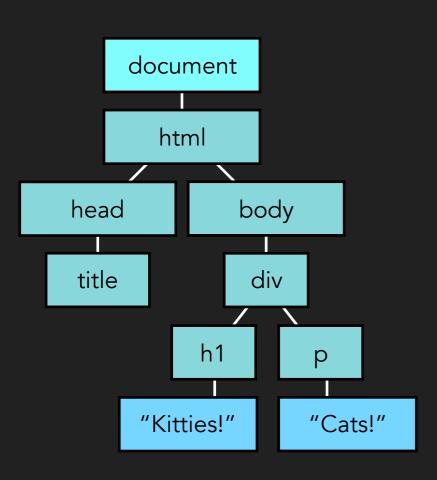

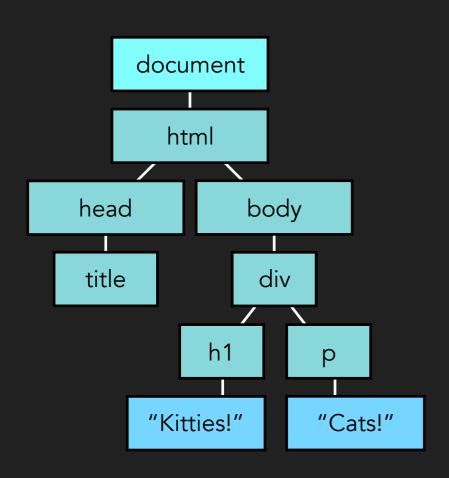

We did everything right,
Bytes are on the client side

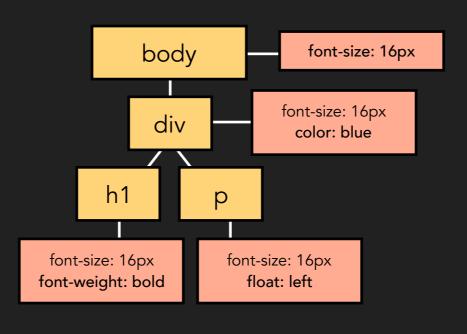

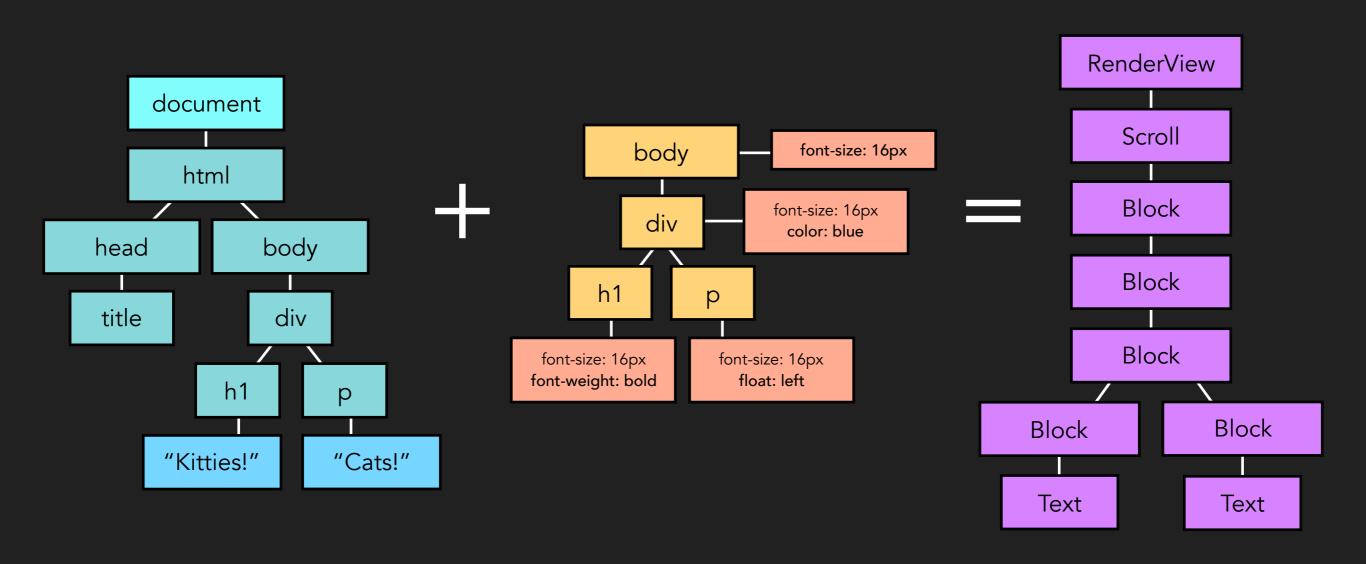

```
Are you listening?
(Whoa-oh-oh-oh)
Please come back.
(Whoa-oh-oh-oh)

I'll tell you what do I need
I'll tell you what do I need
Whoa-oh, whoa-oh
```

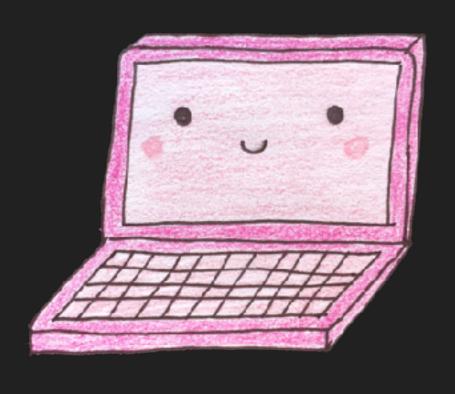

# KEED D things Small!

Harder, Better, Faster, Smaller

minify your html, css, and js

Got some files to send over And their length's inflamed Remove the whitespace, baby It'll up your game

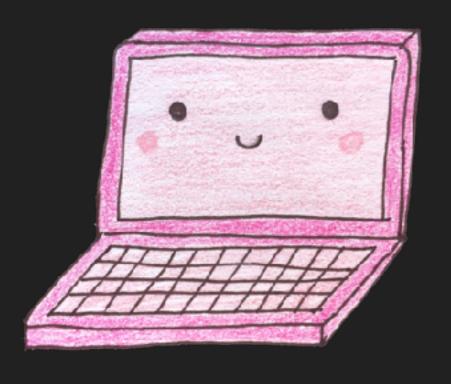

minify your html, css, and js

```
var array = [];
for (var i = 0; i < 20; i++) {
  array[i] = i;
}</pre>
```

minify your html, css, and js

```
for(var a=[i=0];++i<20;a[i]=i);</pre>
```

compress your html, css, and js

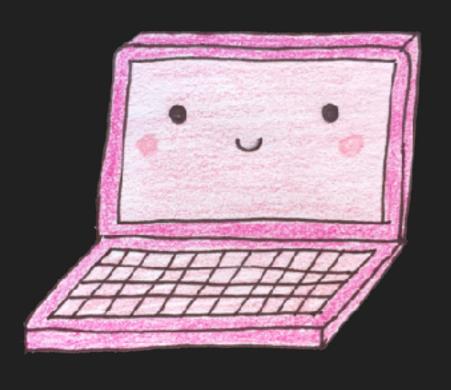

```
Shrink it down,
gzip it
(Don't reverse it...)
```

#### compress your html, css, and js

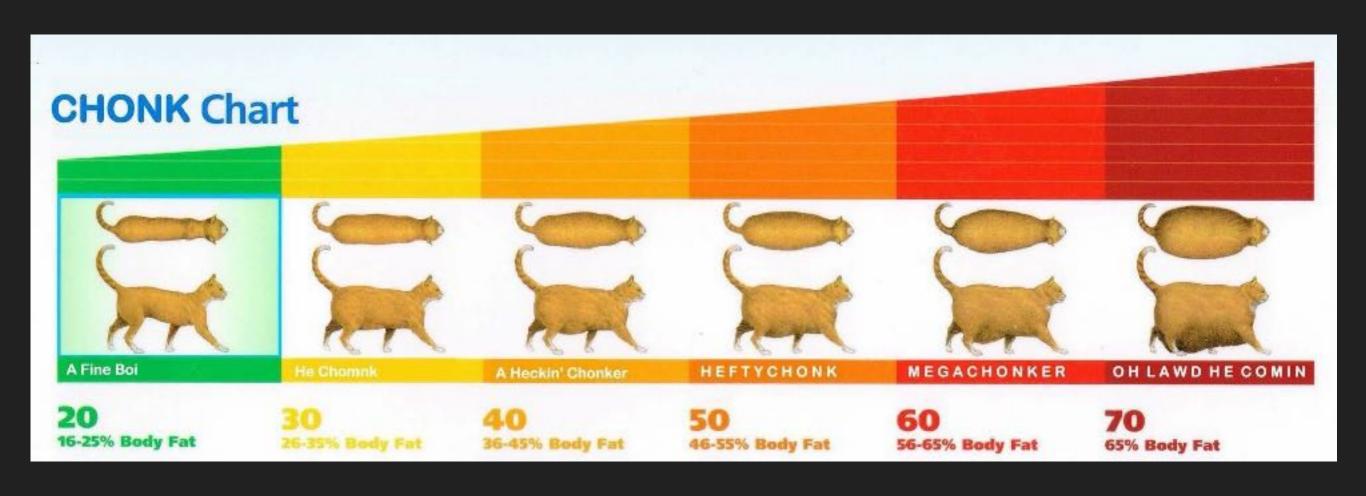

<b>&lt;&gt;</b>	C031M2YLA/ /messages	GET	200	<b>43.4 KB</b> 176 KB	
CSS	modern.vendor.8fe556b.min.css a.slack-edge.com/bv1-6	GET	200	<b>53.2 KB</b> 340 KB	
CSS	application.10d5ac2.min.css a.slack-edge.com/bv1-6	GET	200	<b>40.9 KB</b> 253 KB	
JS	modern.vendor.965584b06b8c78ee54e7.min.js a.slack-edge.com/bv1-6	GET	200	<b>1.6 MB</b> 6.9 MB	
JS	application.0678883039714b0d6b51.min.js a.slack-edge.com/bv1-6	GET	200	<b>679 KB</b> 2.8 MB	
	slackbot_192.png a.slack-edge.com/16510/img	GET	200	<b>5.8 KB</b> 5.7 KB	<u>:</u>
	downloads_empty@2x.png a.slack-edge.com/b8a7/img	GET	200	<b>6.0 KB</b> 5.9 KB	<u>;</u>

optimize your images

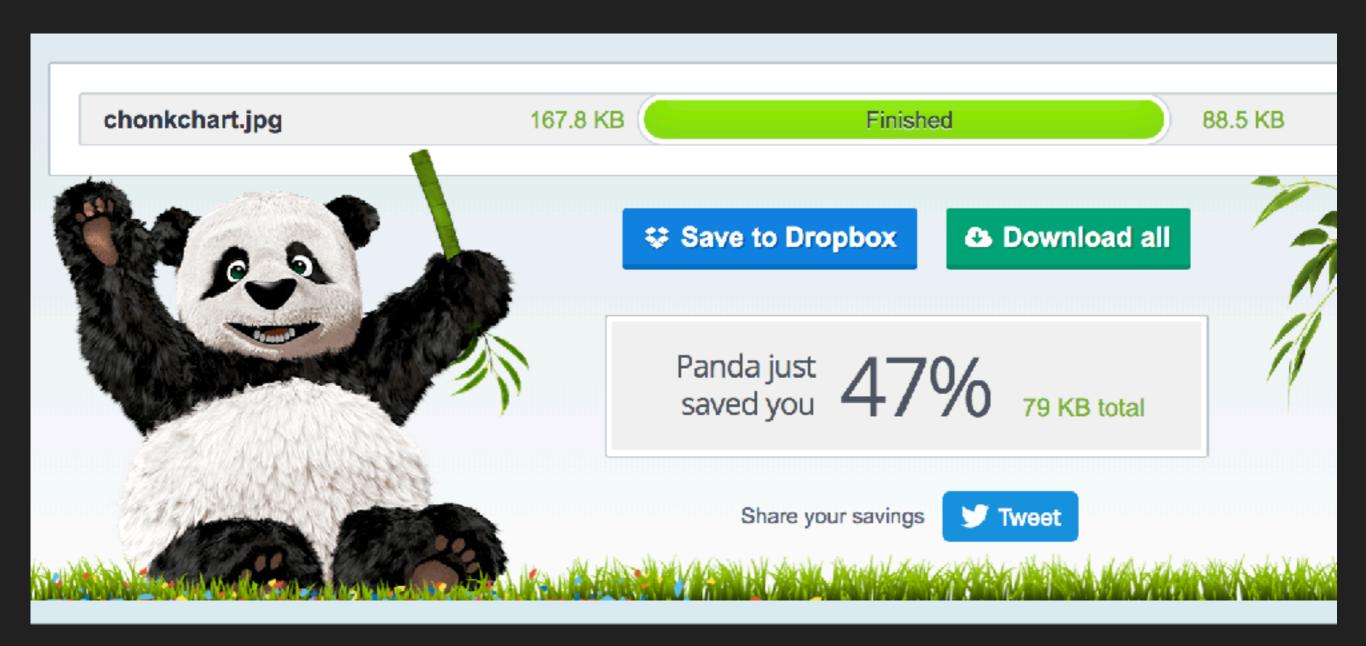

All the small things What speed this brings!

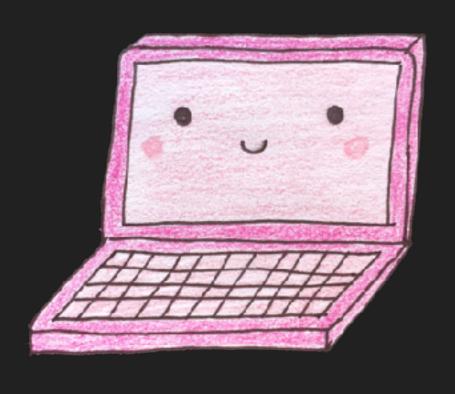

#### optimize your images

optimize your images

#### optimize your images

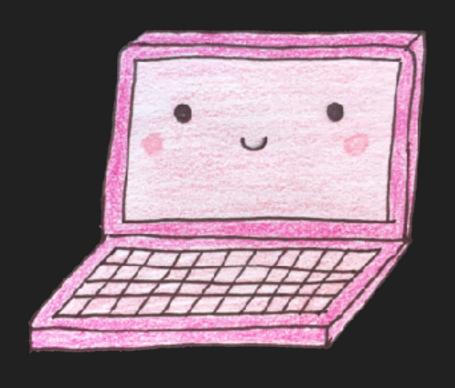

JPEG, I really wanna

Be with you

'Cause you just my type

Ooh, na, na, na, na

#### optimize your images

The picture is far too big to look at kid Your screen's just not wide enough

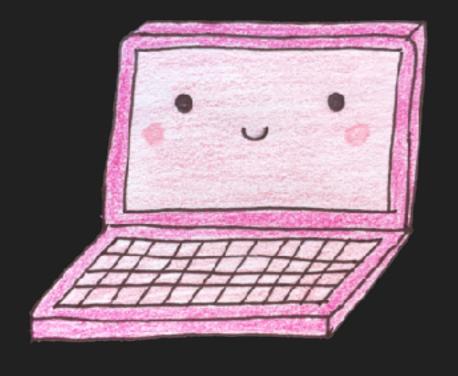

#### optimize your images

```
<img
  srcset="miso-320w.jpg 320w,
          miso-480w.jpg 480w,
          miso-800w.jpg 800w"
  sizes="(max-width: 320px) 280px,
         (max-width: 480px) 440px,
         800px"
  src="miso-800w.jpg"
  alt="Miso, a big, red cat">
```

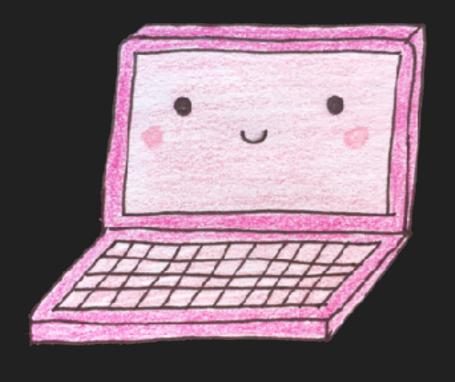

#### optimize your images

```
<picture>
  <source
    media="(max-width: 799px)"
    srcset="miso-480w-close-portrait.jpg">
  <source
    media="(min-width: 800px)"
    srcset="miso-800w.jpg">
  < img
    src="miso-800w.jpg"
    alt="Miso, a big red cat">
</picture>
```

#### caching

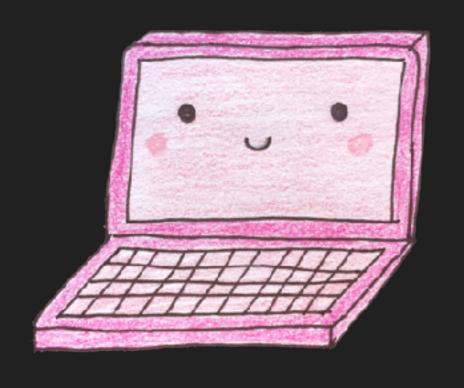

#### caching

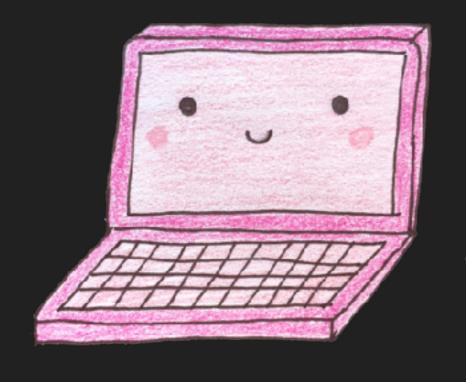

Pull it down, I'm yelling timber Unless it moves or gets enhanced This data, I'm told to remember Until it tells me to forget

caching

There's no
Deliver-iver-iverace
If it doesn't
Ever, ever change

only include \*necessary\* files

Well I know that
I'll get through this
'Cause I know that I am smart
I don't need you anymore
I don't need you anymore
I don't need you anymore
No I don't need you anymore...

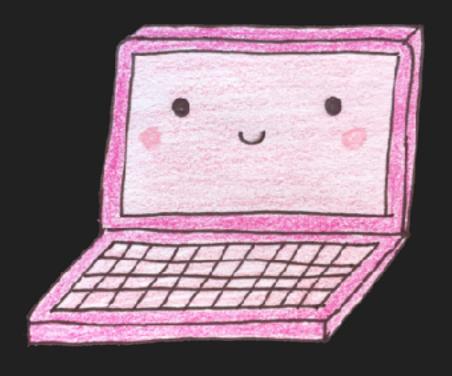

>>>>

only include \*necessary\* files

```
import _ from 'lodash';
```

```
import {
  debounce,
  values,
} from 'lodash'
```

only include \*necessary\* files

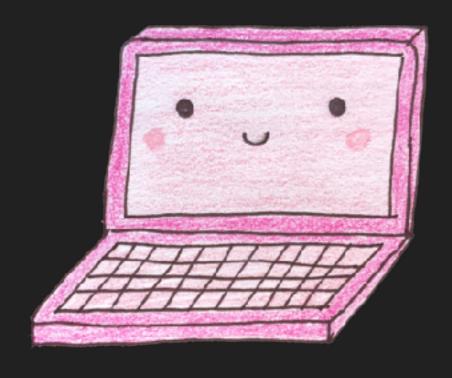

Shake it, shake it, shake it,
Shake it, shake it,
Shake it, shake it,
Shake it like a JavaScript bundle
Hey ya!

## keep things small

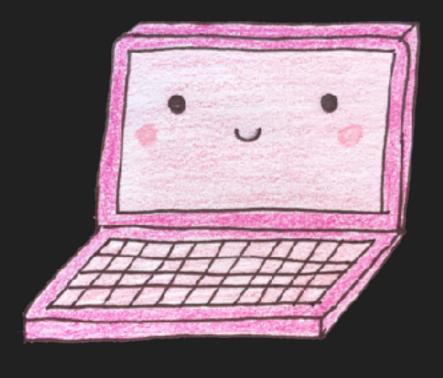

#### optimize fonts

Baby I don't need fancy glyphs
To have a good site
(Yay system fonts!)

## keep things small

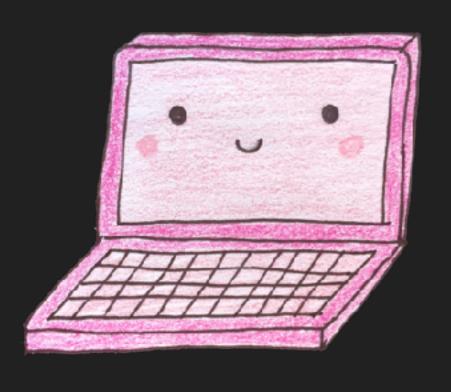

put your assets in a cdn

I feel so close to you right now

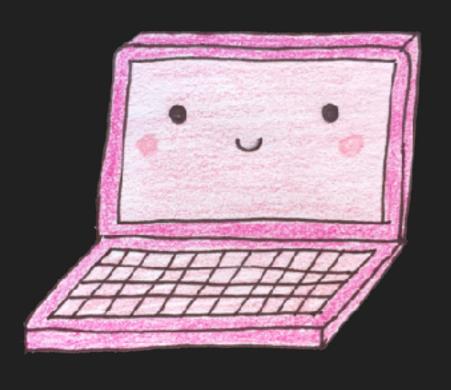

# KEED things Smart.

concatenate your css and js

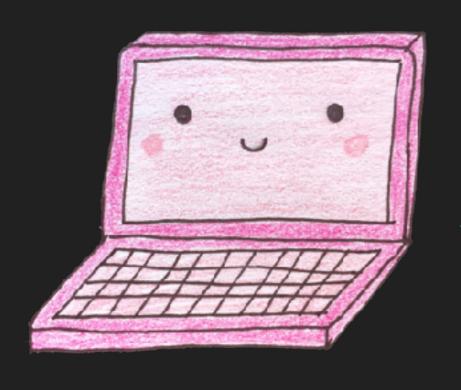

Come together, right now Up the speed

use image sprites and icon fonts

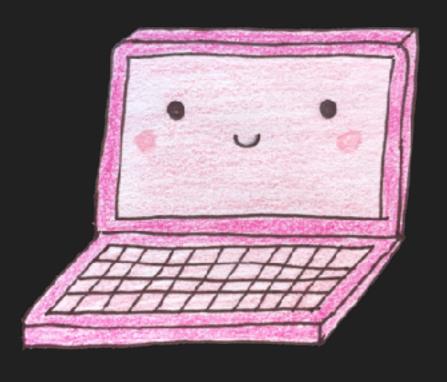

Yeah, it's always better When they're together

#### domain sharding

```
Are we breaking up?
(Breaking up)
Are we breaking up?
(Breaking up)
Is there a different subdomain
Between you and I?
```

#### make js non-blocking

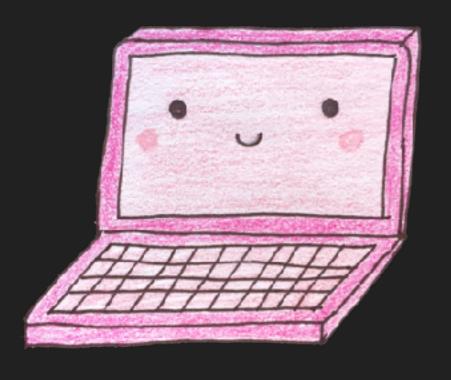

Scripts go at the bottom

Not up here

Scripts go at the bottom

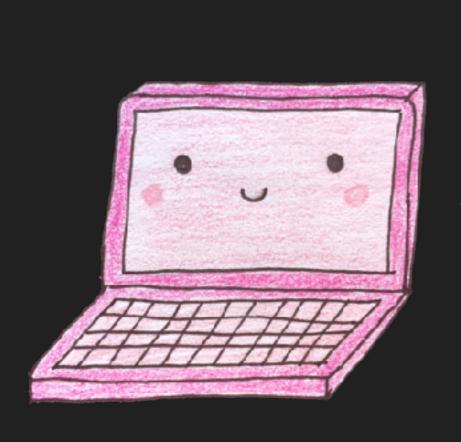

So the whole page freakin' here

#### make js non-blocking

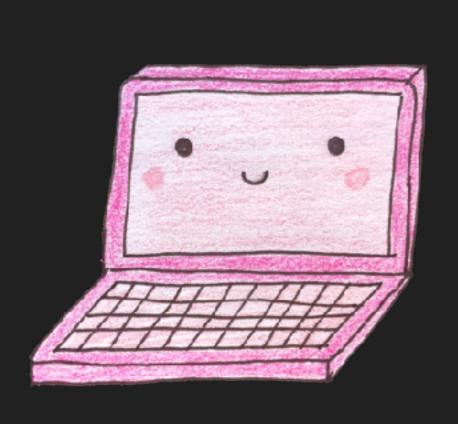

So I don't take the fall
Of a document.write call
When I see you, everything stops
Never put the scripts on top

make js non-blocking

We can't stop...

make js non-blocking

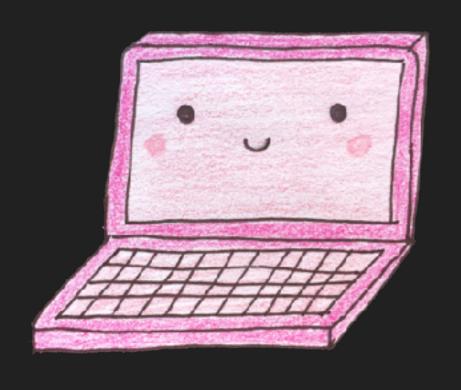

And we won't stop...

make js non-blocking

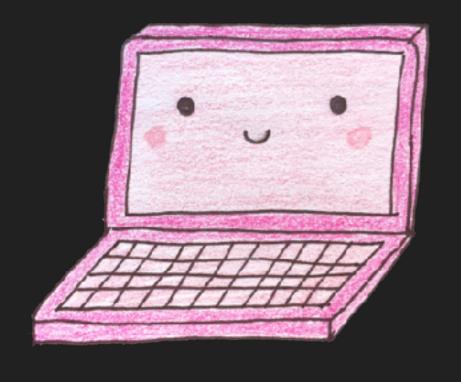

```
<head>
    <script defer src="lib.js"></script>
    <link href="styles.css">
</head>
```

```
<head>
    <script async src="lib.js"></script>
    link href="styles.css">
</head>
```

#### make js non-blocking

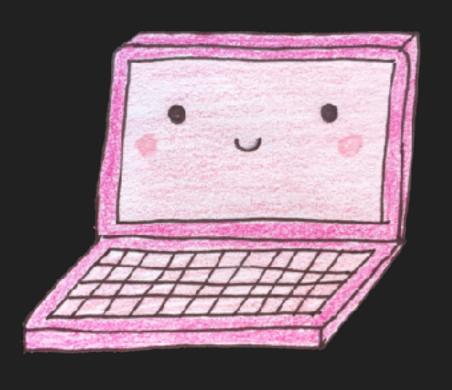

#### put css at the top

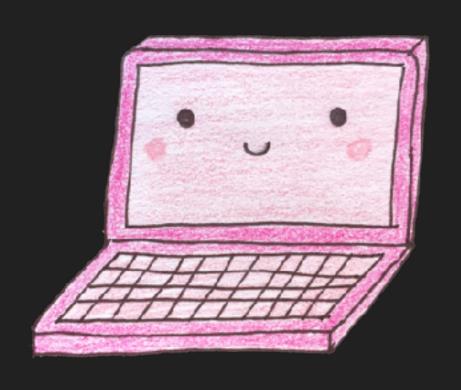

```
In your <head>
    In your <head>
Stylesheet, stylesheet,
    eet, eet, eet
```

put css at the top

Critical styles inlined
To keep this page load streamlined

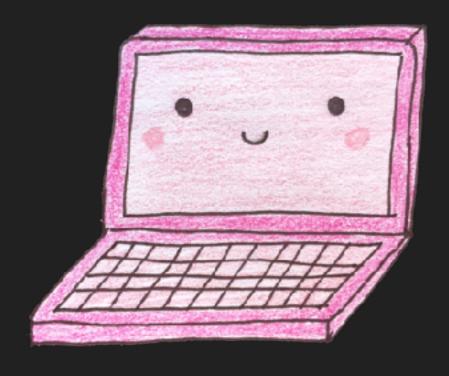

use http/2

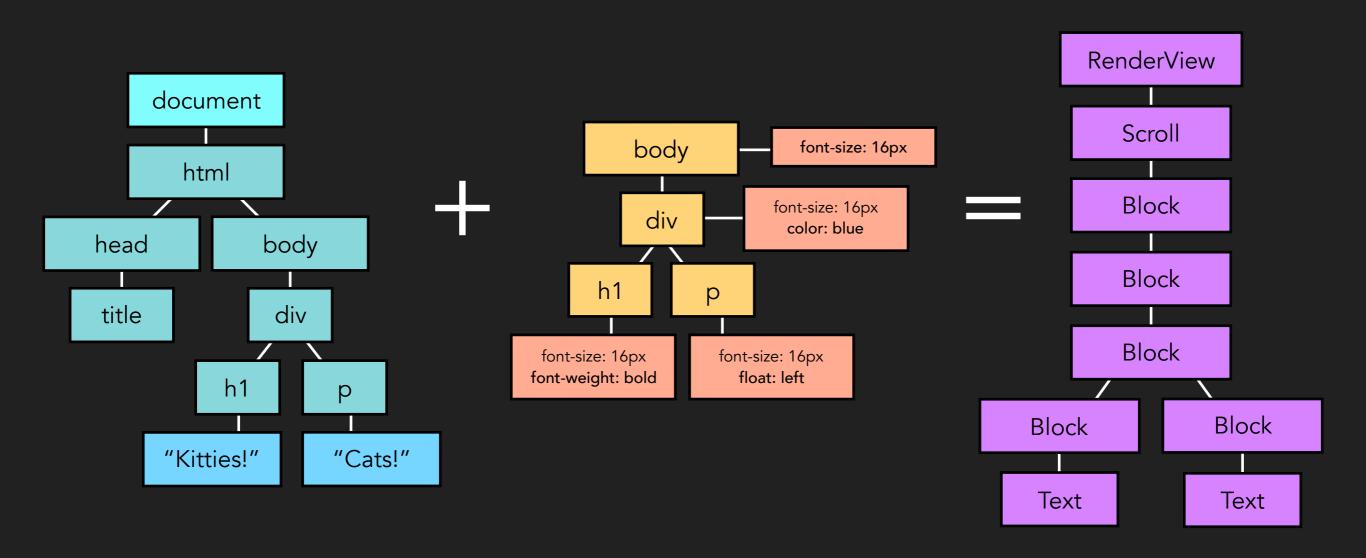

How you gonna upgrade me?
What's higher than
One point one?

# KEED things s mooth

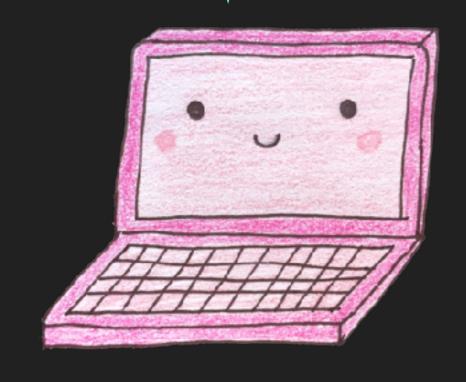

You got the kind of scrollin'
That can be so ~smooth~, yeah
Get rid of jank, make it real
Or else forget about it

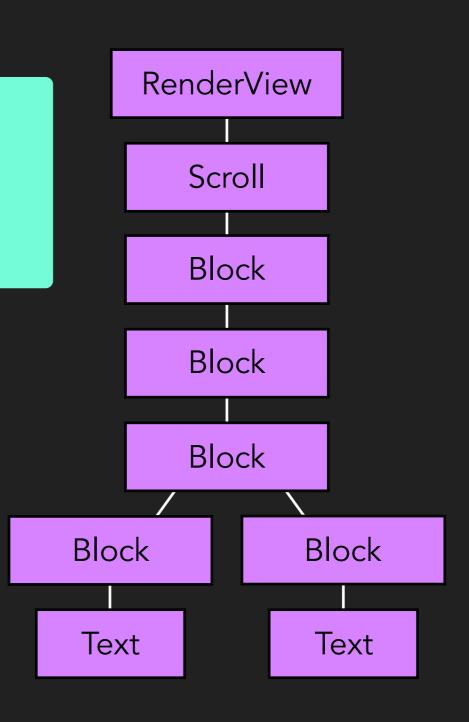

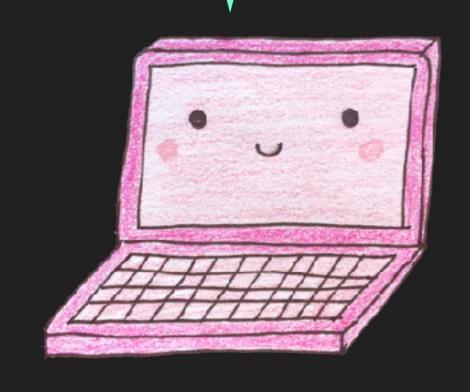

RenderView Cause the render's gonna ... Scroll rend, rend, rend? 7 7 7 Block Block Block Block Block Text Text

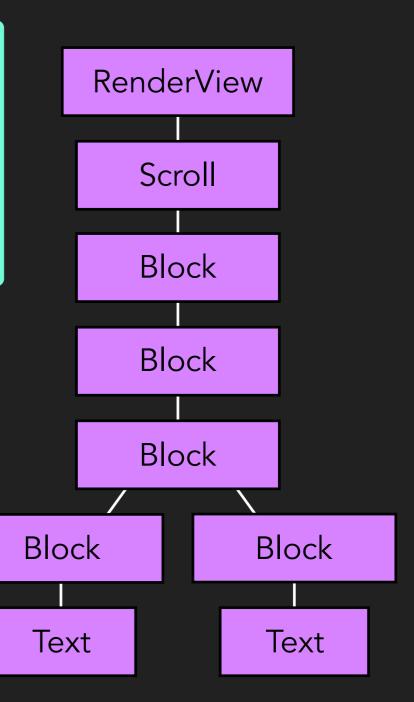

And the painter's gonna paint, paint, paint...

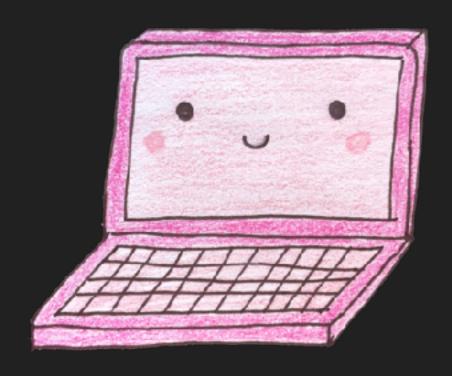

And the compositor's gonna composite, composite, composite,

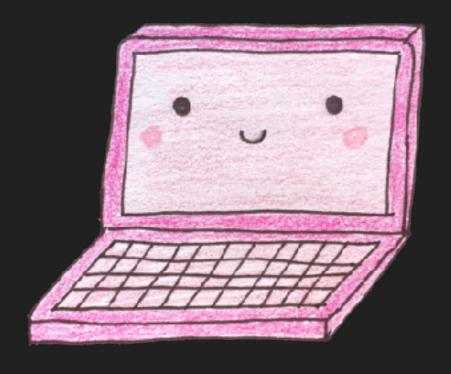

Do it allll agaaain

### how do websites brains

Every frame you forsake
Every move you make
Every time you break
Every paint you take
I'll be watching you

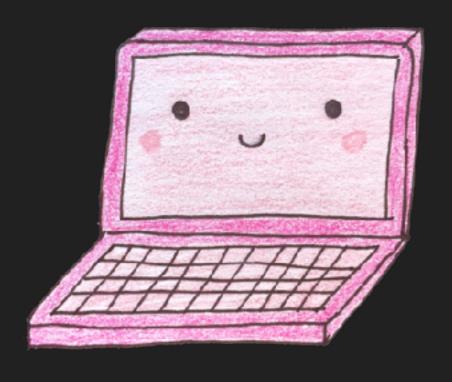

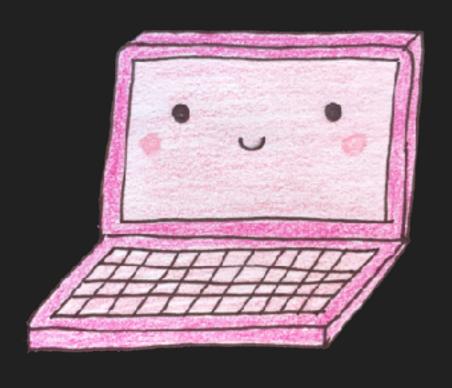

this. sick. feat.

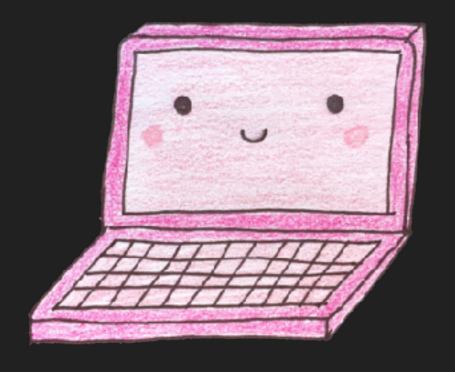

Loop loop ba-doop loop ba-doop
Loop ba-doop ba-doop
Ba-doop loop ba-doop loop
Ba-doop loop ba-doop, ba-doop,
ba-doop

Here's to never ending circles
And building them on top of me
And here's to another no, then
You won't get a render
You won't get a render

debounce or throttle inputs

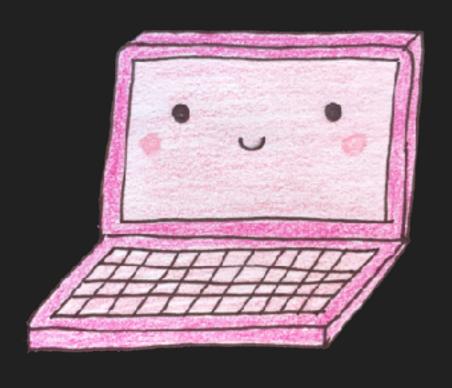

Debouncing all the calls again Whoa-oh!

debounce or throttle inputs

```
import { debounce } from 'lodash';
this.onUserInput =
  debounce(this.onUserInput, 100);
```

#### use requestAnimationFrame

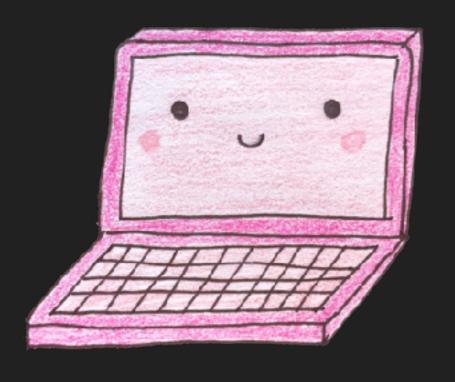

Baby, I'm not always
There when you call,
But I'm always on time
And I gave you my all,
Now baby, be mine

#### use requestAnimationFrame

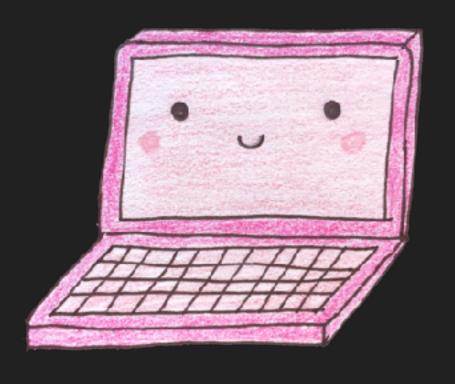

```
window.addEventListener('resize', (e) => {
  if (this.bottomSpan < window.innerWidth) {
    window.requestAnimationFrame(
        this.drawTriangles.bind(this)
    );
    this.bottomSpan = window.innerWidth;
  }
});</pre>
```

#### use web workers

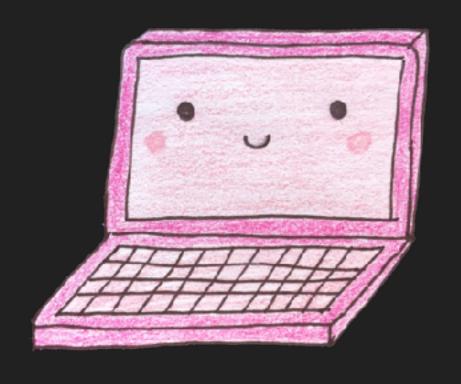

```
Give it away
Give it away
Give it away
Give it away now
```

#### use web workers

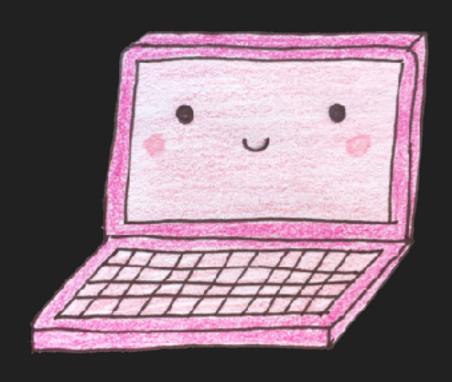

When what you have Will take too long Move along, move along Like I know you do

```
.zoomy {
  position: absolute;
  top: 100px;
  left: 30px;
  width: 100px;
  height: 100px;
  animation: move 3s ease infinite;
@keyframes move {
  50% {
     top: 200px;
     left: 130px;
```

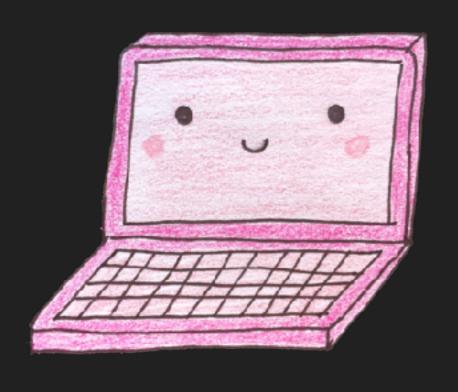

```
.zoomy {
  position: absolute;
  top: 100px;
  left: 30px;
  width: 100px;
  height: 100px;
  animation: move 3s ease infinite;
@keyframes move {
  50% {
     transform: translate(100px, 100px);
```

#### keep things smooth

#### use a css methodology

CSS, take it easy
For there is something
 that we can do.
CSS, take it easy
 BEM it for me
Or BEM it for you.

#### keep things smooth

use a css methodology

```
.box:nth-last-child(-n+1) .title {
  /* styles */
}
```

#### keep things smooth

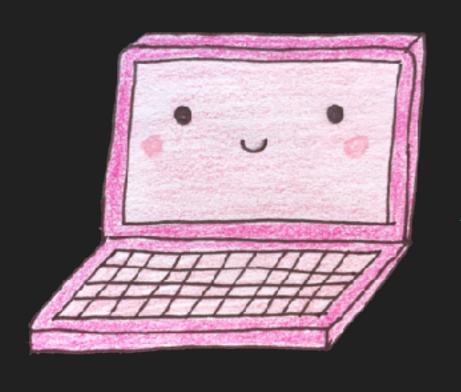

use a css methodology

```
.Box_title--special {
   /* styles */
}
```

# always meassire first

#### always measure first

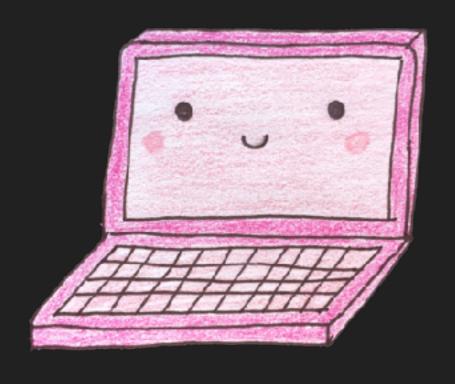

synthetic measurements

Is someone getting the test, the test, the test, the test, the test, the test of you?

#### always measure first

real user measurements

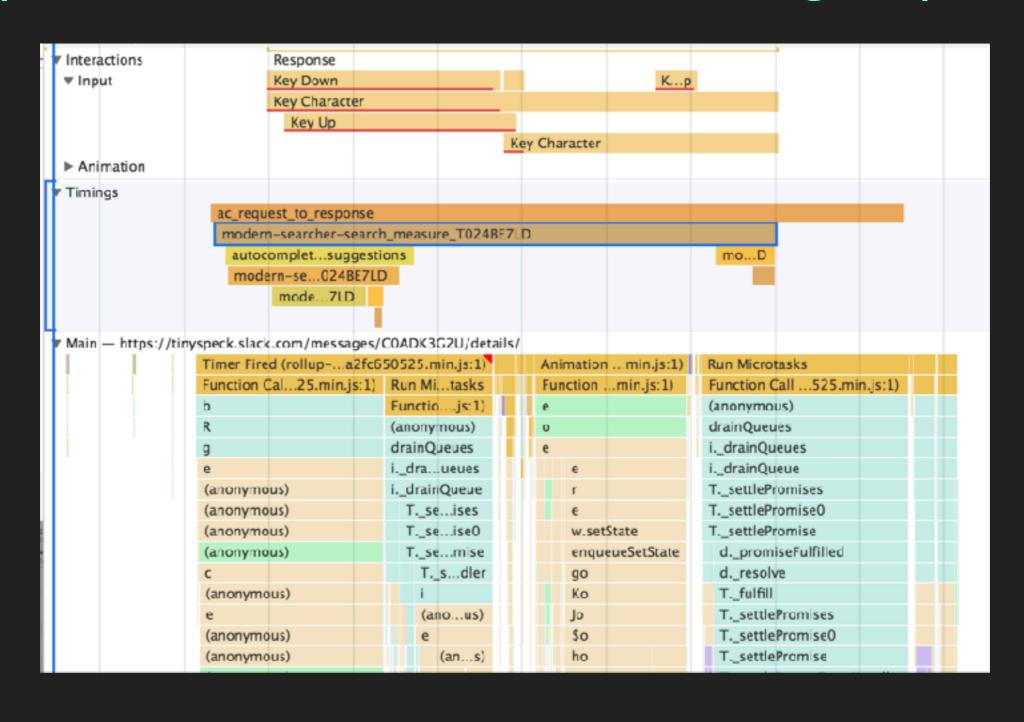

Ain't it fun
Timing in the real world
Ain't it good
Testing in their Chrome

#### always measure first

personal fave: flamegraphs

## seriously, always measure fish

### keep things small, keep things smart, keep things smooth

#### Complete Tracklist

Alanis Morissette - Hand in My Pocket The Supremes & The Four Tops - The Bigger You Love, The Harder You Fall Calvin Harris ft. Ellie Goulding - Outside Jimmy Eat World - Sweetness Daft Punk - Harder, Better, Faster, Stronger Taylor Swift - Blank Space Missy Elliot - Work It Blink 182 - All The Small Things Rihanna ft. Drake - What's My Name Bright Eyes - The Big Picture Gotye - Somebody That I Used To Know Pitbull ft. Ke\$ha - Timber CHVRCHES - Deliverance Cher - Believe OutKast - Hey Ya Sia - Cheap Thrills Calvin Harris - Feel So Close The Beatles - Come Together Jack Johnson - Better Together Rilo Kiley - Breaking Up Drake - Started from the Bottom

\*something witty about a POP server...\*

#### Complete Tracklist

```
Beyoncé - Love on Top
Miley Cyrus - We Can't Stop
Paramore - Misery Business
The Cranberries - Zombie
Taking Back Sunday - Cute Without the E (Cut from the Team)
Beyoncé - Upgrade U
Santana ft. Rob Thomas - Smooth
Taylor Swift - Shake it Off
Katy Perry - Last Friday Night (T.G.I.F)
The Police - Every Breath You Take
Salt-N-Pepa - Shoop
CHVRCHES - Never Ending Circles
Sugarcult - Bouncing off the Walls Again
Ja Rule ft. Ashanti - On Time
Red Hot Chili Peppers - Give it Away
The All-American Rejects - Move Along
Gnarls Barkley - Transformer
Mika - Relax, Take it Easy
Foo Fighters - The Best of You
Paramore - Ain't it Fun
```
